

Commissioning Engineer - Elite Cameron, Inc.

Portland, Maine

Overview:

The candidate must be a problem solver with electrical and mechanical background.

As a Commissioning Engineer, the candidate's responsibilities will include machine installations, start-ups, troubleshooting and servicing of a wide variety of Elite Cameron machinery in North America.

They will be required to train customers on the machines and be competent in working with the associated equipment including auxiliary Allen Bradley PLC control systems, motors, drives and HMI's.

Domestic travel and some international travel for training will be required.

This is a great opportunity for the right candidate to grow with the company.

Qualifications and Skill:

- Practical Experience working with PLC Control Systems, Motors, Drives and HMIs
- Experience with Rockwell Products: Allen Bradley Drive, PLC and HMI.
- Knowledge of the industry is a plus, but not required—we will train.
- 4 Year Bachelor's Degree Preferred
- Excellent machine troubleshooting ability
- Willing and eligible to react to customer needs at short notice
- Excellent interpersonal skills to interact with customers and colleagues effectively.
- Valid Driver's License and Passport

Description:

- Install equipment at customer facilities across North America
- Start-up and train customers on their equipment
- Service existing machine installations and work closely with the After Sales Manager to support the continued growth of the service program.
- Respond to customers with machine issues both remotely and on-site.
- North American travel 50%+.
- International travel for training (UK)

Salary/Benefits:

- Base Salary (*to be discussed based on experience.*)
- Retirement 401K with company match
- Health and Dental

Company:

Elite Cameron, Inc is a world leader in the manufacture of converting machinery used in a variety of industries including paper, flexible packaging, textiles, adhesives, composites, medical, rubber, battery and more. Our equipment includes slitter rewinders, hot melt coaters, laminators, and core cutters. We have a long-standing history of producing high quality equipment with over 12,000+ machine installations all across the globe. To learn more, check out our [Corporate Video](#).
